NOTE : The following list shows the value of East German imports and exports contracted for delivery during 1953, as of 30 November 1953. The first section deals with imports; the second section with exports. The first column of figures gives the planned targets, the second column gives the amounts contracted for under barter exchange agreements, the third column gives the amounts contracted for on a cash (Valuta) basis. The amounts are all quoted in thousands of Russian rubles. It should be further noted that though these items had been contracted for for delivery in 1953, it is not known whether they were actually delivered.
